Climate change: review

B1 · English · 16 questions

Flashcards

 flood	 drought	 solar power	 wind power
 temperature	 fossil fuel	 renewable	 emission
 sustainable	 reduce		

Worksheet: Climate change: review

Name: _____ Class: _____

Write the word.

1.  _____
2.  _____
3.  _____
4.  _____
5.  _____
6.  _____
7.  _____
8.  _____
9.  _____
10.  _____

Fill in the gap.

drought emission flood fossil fuel reduce renewable solar power sustainable temperature wind power

11. The _____ covered many streets in the town.
12. The _____ left the fields dry for months.
13. _____ comes from the sun.
14. _____ makes electricity from moving air.
15. The _____ is very high today.
16. Coal is a _____.
17. _____ energy never runs out.
18. The _____ from that factory is harmful.
19. We need a _____ way to live.
20. We should _____ the waste we make.

Answer the questions.

21. If we use more solar power, the planet will be ...

a) cleaner b) dirtier c) drier d) hotter

22. Global warming is caused by too much carbon ... in the air.

a) dioxide b) drought c) level d) power

23. Rising sea levels are caused by ... ice.

a) freezing b) growing c) melting d) painting

24. If we burn less fossil fuel, the planet will get ...

a) cooler b) noisier c) smaller d) warmer

25. A flood is caused by too much ...

a) drought b) rain c) sunshine d) wind power

26. If we reduce emissions, the planet will have a smaller ...

a) drought b) flood c) fuel d) impact

Answers

1. flood
2. drought
3. solar power
4. wind power
5. temperature
6. fossil fuel
7. renewable
8. emission
9. sustainable
10. reduce
11. flood
12. drought
13. solar power
14. wind power
15. temperature
16. fossil fuel
17. renewable
18. emission
19. sustainable
20. reduce
21. cleaner
22. dioxide
23. melting
24. cooler
25. rain
26. impact
