Climate change

B1 · English · 16 questions

Flashcards

 climate	 global warming	 carbon dioxide	 greenhouse gas
 fossil fuel	 renewable	 solar power	 wind power
 flood	 drought	 temperature	 sea level
 emission	 sustainable	 reduce	 impact

Worksheet: Climate change

Name: _____ Class: _____

Write the word.

1.  _____
2.  _____
3.  _____
4.  _____
5.  _____
6.  _____
7.  _____
8.  _____
9.  _____
10.  _____
11.  _____
12.  _____
13.  _____
14.  _____
15.  _____
16.  _____

Fill in the gap.

carbon dioxide climate drought emission flood fossil fuel
global warming greenhouse gas impact reduce renewable sea level
solar power sustainable temperature wind power

17. The _____ in my country is hot and wet.
18. _____ is making our planet hotter every year.
19. Cars put _____ into the air.
20. _____ keeps heat near the Earth.

21. Coal is a _____ that people burn.

31. We can _____ waste by using less plastic.
32. Climate change has a big _____ on animals.

Answers

1. climate
2. global warming
3. carbon dioxide
4. greenhouse gas
5. fossil fuel
6. renewable
7. solar power
8. wind power
9. flood
10. drought
11. temperature
12. sea level
13. emission
14. sustainable
15. reduce
16. impact
17. climate
18. global warming
19. carbon dioxide
20. greenhouse gas
21. fossil fuel
22. renewable
23. solar power
24. wind power
25. flood
26. drought
27. temperature
28. sea level
29. emission
30. sustainable
31. reduce
32. impact
