Unit 6: The green movement

B1 · English · 16 questions

Flashcards

biomass fuel	 geothermal power	 solar power	 tidal energy
 wind power	 turbine	 sustainable	 generate
 renewable energy	 emission	 recyclable	 landfill

Worksheet: Unit 6: The green movement

Name: _____ Class: _____

Write the word.

1.  _____
2.  _____
3.  _____
4.  _____
5.  _____
6.  _____
7.  _____
8.  _____
9.  _____
10.  _____
11.  _____

Fill in the gap.

biomass fuel emission generate geothermal power landfill
recyclable renewable energy solar power sustainable tidal energy
turbine wind power

12. Some farms make _____ from plant waste.
13. _____ uses heat from under the ground.
14. _____ comes from the sun.
15. _____ comes from the movement of the sea.
16. _____ is clean and free.
17. The wind turns the big _____.
18. We need _____ ways to get energy.
19. Solar panels _____ electricity for our school.
20. _____ will never run out.
21. Car _____s make the air dirty.

22. Glass bottles are _____.

23. Too much rubbish goes to the _____.

Answer the questions.

24. We should use solar power ___ coal to protect the air.

a) because b) instead of c) so that d) unless

25. Plastic bottles ___ and made into new things.

a) can be recycled b) can be recycling c) can recycle d) can recycled

26. The use of wind power ___ air pollution.

a) reduce b) reduced c) reducing d) will reduce

27. If we don't cut emissions, ___.

a) the Earth got cooler b) the Earth will get hotter c) the air will be cleaner d) the sea will be cold

Answers

1. geothermal power
2. solar power
3. tidal energy
4. wind power
5. turbine
6. sustainable
7. generate
8. renewable energy
9. emission
10. recyclable
11. landfill
12. biomass fuel
13. geothermal power
14. solar power
15. tidal energy
16. wind power
17. turbine
18. sustainable
19. generate
20. renewable energy
21. emission
22. recyclable
23. landfill
24. instead of
25. can be recycled
26. will reduce
27. the Earth will get hotter
